

Publication & Presentation Permission Form ISU Children & Staff

We are often asked to share our ideas with other agencies and parents via publications and presentations. For such purposes, we illustrate staff and children's experiences through photography (including digital), videotape, e-mail messages which may include digital photography, web site postings, on-line discussions with professionals and students at ISU and elsewhere. We also find it helpful to share actual examples of children's artwork, creations, dictated writing or actual writing.

For purposes of publication and/or presentation, if you give us permission to use materials, photos or videotape which were made by or include your child, please provide your dated signature below.

Thanks for your cooperation. Through our public education efforts, we hope our program can help improve the quality of child care and education for all children, as well as improve working conditions for all child care staff.

Please complete **one** of the sections below.

Child and Parent Section
